

MUELLER

Component News and Updates

Volume 1 Issue 2

Did you know??

Meet The Component Sales Engineers

Rob Idell, Sales Engineer

Eastern United States

Email: ridell@muel.com

Phone: 1-800-545-5224

Select Option 2 then 3

Fax: 417-575-9898

Mueller has the capability to move the spot spacing in or out on custom ordered dimple jacket to help minimize your weld times.

Mark Donnell, Sales Engineer

Western United States and Canada

Email: mdonnell@muel.com

Phone: 1-800-545-5224

Select Option 2 then 4

Fax: 417-575-9898

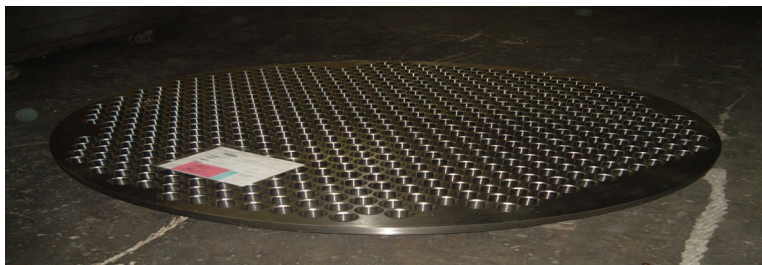

Imagine the cost savings by moving from the standard 2"x2" spacing to 3"x3" or even 4"x4"!

Request for quote may be sent to Rob or Mark via e-mail or fax.

Contact your sales representative for details.

Featured Product - "Quick Drill Services"

Mueller is capable of providing unique drilling solutions. We can drill more holes, machine bevels and grooves, and tap faster than our competition. Hole sizes range from 1/8" diameter to 14" diameter in material up to 10" thick. We are experienced in various metals including carbon steel, stainless steel, hastelloy, inconel, monel and titanium. We provide service to the following industries: pressure vessels, boilers, filter dryers and various chemical and petrochemical process towers.
