

MUELLER® AVALANCHE® FOR PROCESS ICE

AVALANCHE® OFFERS YOU EFFICIENT, RELIABLE PERFORMANCE

Paul Mueller Company is pleased to offer our Avalanche® icemaker in sizes and capacities to fit the needs of the produce and package ice markets.

Our falling film chillers and Avalanche icemakers, manufactured using our patented Temp-Plate® heat transfer panels, are recognized for their long life, efficiency, and reliability.

MUELLER®

THERMAL PRODUCTS GROUP

Avalanche Features and Benefits

◆ **Superior cleanability and corrosion resistance.**

The all stainless steel frame, tubular construction, PVC piping for inlet water supply, and stainless steel drip pan allow for the highest sanitary conditions.

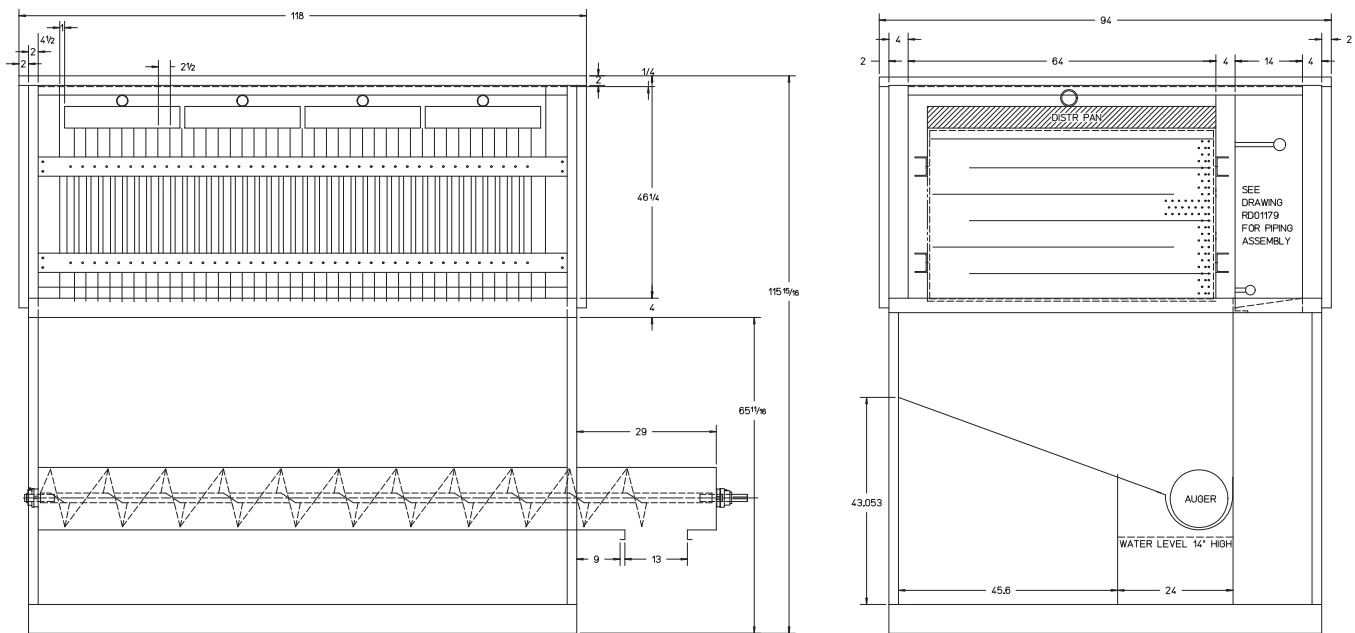

◆ **Flexible and easy to use.** The electronic HMI (human machine interface) with adjustable build and defrost times allows for simple programming for specific size of ice required.

◆ **Proven designs, components, and service.**

Mueller Temp-Plate has been in use for over 40 years, Avalanche has been sold for over 25 years, and our knowledgeable staff can support you as you install and service your customer's equipment.

◆ **Designed for use with R-717 and other common refrigerants.**

Avalanche Dimensions

Model No.	Plate Length	No. of Plates	Length	Width	Height
MA36	36"	36	118"	94"	110"
MA56	36"	56	163"	94"	110"
MA72	36"	72	211"	94"	110"
